

B. 轉鼓篩網濃縮系統 Rotary Drum Type Thickening System

■ 專利証號：台灣119141號

中國ZL96249032.6號

Patent Certificates: Taiwan Patent No. 119141

Mainland China Patent No. ZL96249032.6

■ 污泥調理膠羽後，大量的表面自由水，經篩除分離後，S.S 濃度可提高至4~9% (例圖如下)，達到濃縮及減量功能。The free water separated from the Sludge (which mixed and flocced with Polymer Solution), Suspended Solid Consistency will be adjusted up to 4~9% (Example Photo as below) and reach the function of sludge thickening and Reduction.

■ 經轉鼓篩除後的泥糰結構穩定，無漫流側溢情形，可確實降低濾帶透水負荷，並提高處理量及降低泥餅含水率。

The Stable Structure Sludge after Rotary Drum Thickening will be without Side-leakage, increase the permeability of Filter-Belt, the Treating Quantity and increase the water content's rate of Sludge cake.

濃縮後實例圖片 Example Photo (Sludge after thickening)

C. 落泥方向調整板 Sludge Spread Guides

■ 專利証號：台灣126352號

Patent Certificate: Taiwan Patent No. 126352

經轉鼓篩除濃縮後，導引泥糰落於濾帶中央，確保受力平均。

After Rotary Drum Thickening, Spread Guide will guide the Sludge flocks to drop evenly within central area and share stress in all squeezing area of the Filter-Belt.

證書 Certificate :

我司為環保設備專業製造生產廠家，產品通過ISO9001: 2000品質管理系統認證。

ISO9001: 2000證書號碼：051722

ISO9001: 2000 Certificate No: 051722

Our company is Environment-Protection Equipments Professional Manufacturer, Our Products Obtained the ISO9001: 2000 Quality System Certificate.
